

ACTIVITIES OF THE NASTT TRENCHLESS TECHNOLOGY STUDENT CHAPTER IN BGSU 2018

Here is a list of some of the activities that we have had this year and some of the planned activities for next year.

- Six BGSU students attended the 2018 NO-DIG conference in Palm Spring, CA and their overall impression of it was very positive. The students enjoyed the interactions with the industry leaders, demonstrations, presentations, and many other various conference activities.
- Five chapter-students attended the Gala event of the Great Lakes Trenchless Technology Association. It was an educational program about trenchless technology and utility construction safety.
- For the first time in 18 years, we were not able to offer the CONS 4470 and CONS 5470-Trenchless Technology Construction last spring due to low enrollment and changes in the advising system in BGSU. The instructor is working hard to promote the course now.
 - Many of the chapter activities were taken place within the context of this course, so we had little activities this year.
- The chapter advisor is co-chairing the ASCE taskforce to update the manual of practice for pipe bursting; an ex chapter president Lameck Onsarigo is a member of the task force.
- The chapter advisor have been serving on the Municipal Advisory Board for the Plastic Pipe Institute.
